

BUSI REDDY KARNATI

📞 206-353-0461 ✉️ busisatya@gmail.com 🌐 [busi-reddy-karnati](https://busi-reddy-karnati.com)

Education

New York University

Master of Science in Computer Science

Aug 2021 - May 2023

New York City

Indian Institute of Information Technology

Bachelor of Technology in Computer Science

Jul 2016 - June 2020

Guwahati

Technical Skills

Languages: Golang, Python, Typescript.

Technologies: Linux, Docker, Kubernetes, Git, Terraform.

Databases: SQL, Apache Kafka, Redis.

Professional Experience

Illumio

Senior Member of Technical Staff

Feb 2024 - Present

Sunnyvale, California

- Designed, Presented and implemented Micro services for Usage, Billing, Audit and Reporting using data from 12 dataplanes across 8 different geographical regions.
- Core contributor of [Illumio Terraform Provider](#), adding support for Zero trust segmentation via IP Lists, Rulesets, and Application Policy
- Developed an end to end pipeline for PR Review system using Azure Foundry LLM Models, which sends feedback based on previous PR comments, and coding standards defined in the repository.
- On-boarded the team to Clade Code based off of Enterprise LLMs with specific MCPs, and skills able to handle logs, build messages and PR Conversations via Webhooks.
- Orchestrated and implemented Automation testing framework for Billing, Reporting and Audit services, maintaining an **99.99% uptime** over the last year.
- Developed infrastructure to support geographically distributed network of dataplanes reporting constant audit updates upto **10 million messages** a minute.

Voice Research Lab, University of Pittsburgh

Systems Programmer

Jul 2023 - Feb 2024

Pittsburgh, Pennsylvania

- Collected EKG, Glottal angle, and PEP metrics from participants, analyzed patterns of behavior between baseline and stress-induced simulations.
- Worked on unity engine to render 3d video to simulate multiple scenarios to capture subject responses under strain.

Oscar Health

Software Engineer Intern

May 2022 – Aug 2022

New York City

- Developed a navigation system with statistics for processed claims using Flask, reducing developer time spent by 100%.
- Designed the system and implemented a framework for shadow testing the insurance claims adjudication system with scaling procedures and load shedding capable of handling more than 300,000 claims per month.
- Restructured the pipeline of processing claims to selectively fetch data eliminating information exchange between layers.
- Designed a data distribution mechanism to make shadow testing faster by 90% utilizing patterns in forms' data.

New York University

Course Assistant & Research Assistant

Spring '22, Fall '22, Spring '23

New York City, New York

- Course Assistant in the Tandon School of Engineering for the course Foundations of Computer Science in Spring '22 and Fall '22 Semesters.
- Course Assistant in the Tandon School of Engineering for the course Big Data System in Spring '22, Fall '22 and Spring '23 Semesters.
- Research Assistant in Stern Business School for the Natural language Processing lab in Fall '22 and Spring '23 semesters.

Larsen and Toubro Infotech

Software Engineer(NodeJS, AWS)

20 Nov 2020 – 06 Aug 2021

Mumbai, India

- Redesigned the primary website for [MoSPI](#) using React, improving responsiveness and reducing latency by 20%
- Collaborated to redesign APIs that serve performance indicators periodically by implementing caching mechanisms, reducing the turnaround times by 30%.
- Tested and delivered an internal query escalation tool to Marsh and McLennan Companies used by over 40,000 people.
